

## CS411 Case 1

NAME:

BUID:

Please answer these questions about the Bloomberg article "What is Code", the article is available as a PDF on Piazza.

A good strategy is to read the questions first and fill them in as you read. Turn in your response on Gradescope.

1. What does TMitTB stand for?
2. The author includes a program to test an input to determine if it is a palindrome. What language is the program written in?
3. According to the author, what is one of the most beautiful things about programming?
4. What language and frameworks were finally chosen for the project?
5. What does the author feel is the hardest work in programming?
